Addresses and SAP?

Addresses are an important basis of many business processes:

- Distribution
- Logistics
- Human Resources
- and many more

Unreliable address data leads to, among other things:

- unnecessary CO_2 emissions
- increased costs due to failed attempts and detours
- inaccurate reporting due to incorrect allocations
- false invoicing

The benefits of valid addresses are, for example:

- more sustainable processes
- More deliveries in less time
- fewer returns or repetitions

The **abat Address Validation Starter** provides an overview of the quality of address data in an SAP system!

With the Business Partner concept in SAP S/4HANA, there is one central object for all addresses.

References and partners:

PTV GROUP

The abat Group is one of the leading SAP service providers for the automotive and manufacturing industries in Germany.
With the abat Address Validation Starter, we ensure an improvement in master data quality where it is right: at the source. Let your downstream processes benefit from this!

Here's how we do it:

- Verification of 10,000 selected addresses from max. 2 EU countries

- Implementation optional:
  - within your SAP system by importing our address validation into your SAP system
  - in our test SAP system. You provide us with the addresses as EXCEL download

- Categorizing and qualitative consideration of the results

This is what we deliver:

- Clear classification and quantification of addresses:
  - clear/ambiguous
  - incorrect
  - incomplete
  - double

- Notes on corrective measures and quality increase in the inventory

- Consulting for long-term quality assurance
