

SAP Performance Booster

Checking for a High-Performance SAP System

abat is a cross-industry specialist in highly available software and digital solutions. Our services include system development, secure operation, and optimization and transformation of existing systems. We focus on optimal configuration to ensure the stable and efficient operation of your SAP system landscape.

With our SMARTsolution SAP Performance Booster, you'll get:

- Transparency into critical performance metrics (KPIs), such as system utilization, work processes, dialog response times, and job runtimes
- Identification of bottlenecks, taking into account all components (database, application server, and web server), as well as external access points (front ends and interfaces)
- Dedicated analysis of table growth to identify opportunities for SAP data cleansing and archiving
- Targeted measures to ensure the long-term stability and efficiency of your SAP landscape (on-premises and Cloud ERP Private)
- Consolidated evaluation of key metrics for rapid root cause analysis

Would you like to discuss specific findings? We'd be happy to address your needs during our initial consultation.

Here's how we proceed:

- Workshop to analyze the current situation and define areas for action
- Review of all performance-related components of your system against SAP best practices
- Knowledge transfer to ensure proactive performance monitoring

We deliver the following results:

- Detailed audit report and presentation of the analysis results
- Measures for immediate implementation, as well as recommendations for medium- to long-term optimization
- Recommendation to implement proactive monitoring to ensure the long-term stability and performance of the system.
