

# Process Optimization Starter Package

With SAP Signavio Process Manager

## Set up. Align. Bring processes to life.

Interested in process optimization with SAP Signavio Process Manager? You can use it as part of your “RISE with SAP” package or as a standalone license. Use established BPMN modeling to map your processes and dynamically adapt the process steps. There are no limits when integrating and aligning with SAP best practices and standard templates, or when dealing with custom processes. Coordinate all process steps with the responsible parties and establish transparency. This shared foundation is equally useful for training and audit documentation.

With our SMARTsolution, we will help you set up the tool in the most practical and efficient way possible. This lays the groundwork for a structured, transparent process landscape, freeing you from the complexities of configuration.

## Here are your benefits at a glance:

- Quick start without detours: Field-proven setup for rapid deployment
- Clear structures from the start: Glossary, process hierarchy, and governance
- Reliably manage responsibilities: Transparent role and authorization concept
- Targeted training for your end users
- Foundation for documentation compliant with auditing standards

abat is one of the leading SAP service providers for the automotive, aerospace, and defence sectors, as well as for the manufacturing industry, in Germany, Mexico, and the United States. With many years of expertise in process management, we lay the ideal foundation for building a centralized, structured, transparent, and enterprise-wide process landscape by optimally configuring SAP Signavio Process Manager.

## This is how we proceed:

- Tool setup, including:
  - Selection of one of your core processes
  - Establishment of the process hierarchy
  - Creation of the glossary structure
  - Configuration of user roles
- Definition of target audiences for enablement strategies and training
- Creation of a roadmap for next possible steps and recommendations for action

## We deliver these results:

- Visualization of one of your core processes in SAP Signavio Process Manager
- Trained users who are ready to work immediately
- A concept for seamless integration with SAP Cloud ALM or SAP Solution Manager, as well as alternative import strategies for existing process documentation
