

Get Ready for BTP!

When, for what and how should you use the SAP Business Technology Platform (BTP)?

- What added value does the SAP BTP offer you?
- What services are available to you?
- How can BTP be integrated into your IT landscape?
- What role do the cloud and hyperscalers play in this?

What are the benefits of the SMARTsolution?

The SMARTsolution „Get Ready for BTP!“ provides you with an overview of the SAP Business Technology Platform and its various services that is individually tailored to your company.

- We provide you with a comprehensive overview of all relevant SAP BTP services and technologies.
- We work with you to develop integration solutions to seamlessly integrate BTP into your existing IT landscape.
- We will show you how you can utilize the full potential of BTP for your company and use it profitably.
- We also provide clarity about the various SAP license models and help you to find the right solution.

abat is one of the leading SAP service providers in Germany and successfully supports numerous companies with their S/4HANA transformations. SAP itself emphasizes that the Business Technology Platform is a central component of modern business solutions. But which of the many components is best suited to your company's requirements?

This is how we proceed:

- We determine the status quo of your current IT environment and take your future requirements into account.
- We design a customized workshop based on your specific wishes and objectives.
- We work together to develop solutions in the core areas:
 - Development
 - Integration
 - Data & Analytics
 - Artificial Intelligence

We deliver these results:

- We show you the potential and added value of the SAP BTP, individually tailored to the needs of your company.
- Deep dives into the BTP services relevant to your company provide clarity and concrete approaches.
- You will receive a solution outline from us with recommendations on the architecture of your target system landscape and possible use cases.
- We create a clearly understandable picture of BTP's license models and how they can be used optimally for your company.
