

fit4Catena-X

Fast, structured, and practical

Is your company also feeling increasing pressure to register with Catena-X?

More and more OEMs are requiring participation in the data ecosystem, making compliance requirements, high standards for data quality, and seamless integration into existing automotive supply chains mandatory expectations.

With our SMARTsolution, you can master these challenges:

- Participation in Catena-X – Avoid compliance risks
- Confidently integrate complex IT landscapes
- Get started quickly despite limited resources

Effectively leverage Catena-X – Create added value beyond registration

Catena-X delivers tangible added value, for example in CO₂ footprint reporting, sustainability certification, digital product and battery passports, and quality management through digital twins.

Data sovereignty is crucial here – that is, maintaining control over your own data while ensuring its secure and managed use.

Integration is achieved via standardized Eclipse Dataspace Connectors (EDC) and connections to ERP, PLM, and MES systems, tailored to the respective maturity level of the IT infrastructure.

abat has been a member of Catena-X since March 2023 and supports cross-company data exchange within the automotive value chain. As a Catena-X Qualified Advisory Provider, we assist companies with the implementation, use, and integration of Catena-X.

Here's how we proceed:

- Kick-off workshop & status analysis
- Use Case Evaluation & Prioritization
- Onboarding with Cofinity-X*
- Integration Concept & Data Quality Check

* Cofinity-X = exclusive operator of the Catena data ecosystem

We deliver the following results:

- Comprehensive understanding of Catena-X, including its processes and technical functionality
- Successful onboarding with Cofinity-X
- Concrete recommendations for action regarding interfaces, data quality, and use cases
- Relief for your teams by taking over complex coordination activities
