# Your SAP Partner for Automotive

The abat AG is a leading international SAP consulting company for the fields of Automotive and Logistics. As a Consultancy and System Integrator with profound branch know-how we provide support for the successful realisation of optimisation and change processes. Our company was founded in 1988 and has been a Service Partner of the SAP AG since 1999. Today we have over 700 employees. In order to be able to support our customers with Nearshoring Models and Application Management, we have had subsidiaries in the USA (abatUS), Mexico (MEXabat) and Belarus (BELabat) for several years.

Since 2009 the product house abat+ GmbH in St. Ingbert in the Saarland region of Germany has been part of the abat Group. With PLUS, abat+ provides a unique high availability solution for production planning, production control and quality management for the discrete industries in manufacturing. PLUS is used as a worldwide standard software solution in the entire division of the Mercedes-Benz passenger cars and Smart for the production control of the assembly plants.

## Branch know-how in depth and breadth

Our customers from the automobile industry benefit from our extensive branch know-how. We combine this with excellent knowledge of the SAP Technology and Architecture. This is meaningfully expanded by experience gained over many years in Supply Chain Management, in Distribution and Procurement Logistics, Project Management and Maintenance. Our customers benefit from our knowledge also in matters concerning accounting and controlling. A further central benefit of our offerings: Where other

SAP-Automotive specialists stop at production control, we close the gap with PLUS.

Our customers include Audi, BMW, Daimler, VW, the Deutsche Post Worldnet, DHL, Hermes etc.

## Our services for more performance

We advise our customers and deliver efficient total solutions. In so doing, we optimise processes along the entire supply chain from the development to logistics and production. We perform the conception of process design as well as the software implementation and the integration in the corporate structures.

An excerpt from our range of services:

- Consultation and development of solutions from product definition processes to production
- Specialists in PLM (Product Life-Cycle Management), especially in the environments iPPe and PVS
- Management of logistical supply system at plants
- Configuration and monitoring of international templates
- Application Management Services for international systems
- Integration of SAP solutions in complex, heterogeneous customer systems

## High commitment for your success

Our consultants have many years of international experience. They advise during the optimisation of work processes and realise the resulting concepts by applying SAP standard functions or by programming customer-specific add-ons. They communicate openly and address the respective needs of our customers. This is reflected in the level of customer satisfaction. Because our corporate culture guarantees successful projects - over the long term. We provide absolute transparency regarding offers, costs and in project realisation. This way we provide a comprehensive overview and achieve high quality results regarding time and budget.

## ABOUT US

# abat

The abat Group, founded in 1998, is an SAP service provider, innovative software developer and provider of complete solutions for software-supported process optimization –

primarily in the core industries of automotive and discrete manufacturing as well as in logistics processes and production control. With our six service areas, we give companies the freedom they need for new ideas, efficient processes, and future-oriented solutions.

In the **consulting** service area, we advise and support you in all phases of an SAP project – from conception to implementation to operation of your SAP system. With abat **manufacture**, you receive digital, high-availability solutions for production control in the complex manufacturing industry. With abat **transform** we offer you innovative and unique solutions that make you special: from AI to cloud to X-Reality. The **PLM** area offers comprehensive process consulting with the goal of achieving a continuous data flow across PLM, ERP and MES. Offerings from the **protect** area help customers secure information and maintain the confidentiality, availability, and integrity of business relationships. Finally, our **sustain** experts advise on how sustainability and CSR reporting can be strategically and structurally anchored in the company.
