## Discover the **VALUE** of UI5

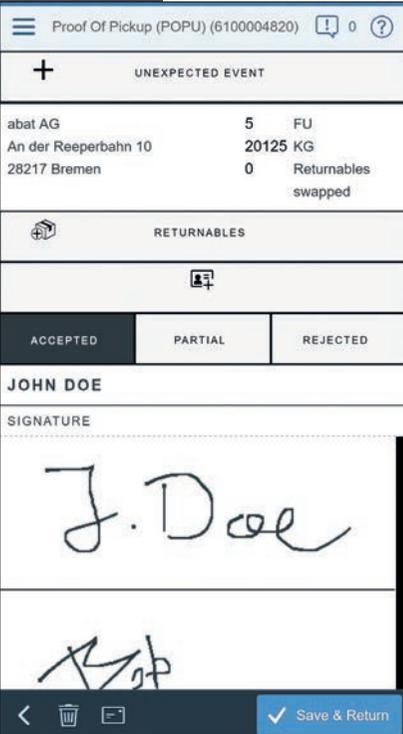

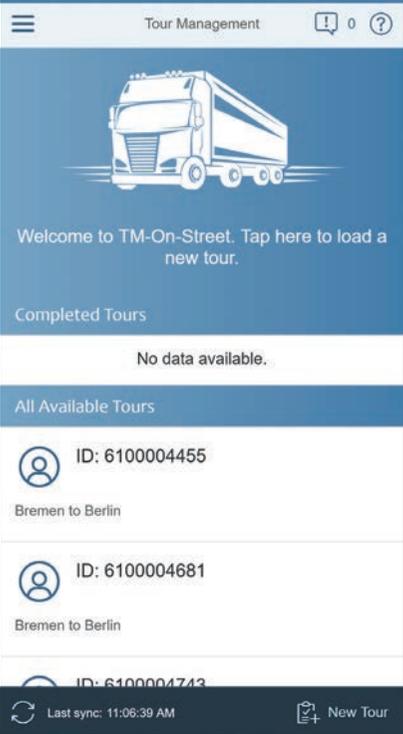

abat adds value to your business

Open**UI5**

# Gear up for the future of SAP

The newest SAP software experience, known as Fiori, is a dramatic shift from traditional SAP applications. Based on UI5 technology, the innovations of the web can now be a part of your SAP landscape. Two-speed IT, Cloud Computing, the Internet Of Things, a mobilized workforce...all of these innovations are so profound, it can be hard to imagine the impact, or opportunity, to your business.

We are experts in UI5 and SAP technologies. We have delivered innovative software experiences to productive use, we understand the challenges involved. Let our experiences add value to your company's IT landscape.

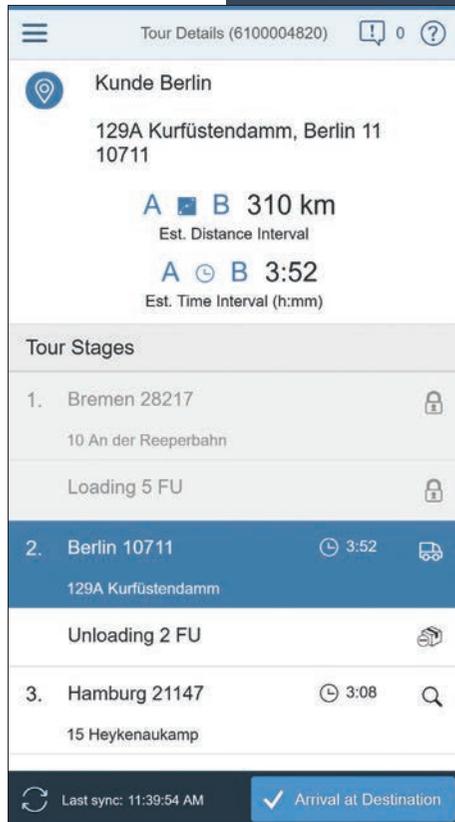

Our flagship mobile-optimized app, TM-On-Street, supports of offline usage, GPS tracking, signature capture, barcode scanning, camera and more. A comprehensive work ow function permits truck drivers to complete all of their required tasks, by just tapping the blue footer button at each step.

Other mobile-first apps include swipe-gesture navigation & animations, advanced responsive designs and wifi-based location detection as is now delivered to the small but capable mobile viewport.

## Visualize your data

Desktop applications are of course relevant for user experience innovation. Data-rich scenarios can be visualized in compelling ways that were not possible before..

- Timesheets in a planner layout
- Drag & drop
- Superuser hotkey support
- Charting statistics
- Fast & intuitive workflow
- Validation rules reduce back-office workload
- See page 2 Timesheet responsive design

- Highly custom UI
- Quantitatively highlight supply chain issues
- Transitions & animations
- Supports XL displays

- Visualize real-world processes
- Detail-rich without overwhelming
- High performance
- Real-time data push via websockets
- Native app experience (Electron packaging)

The screenshot displays the 'Assembly Emulation Client Sample Abat AG' interface. At the top, the 'Loglevel' is set to 'Überwachung'. The main area, titled 'Visuelle Ausgabe', shows a production line with four main process stages: INIT, MP01, MP02, and MP03. Each stage is represented by a grid of bars indicating the status of various workpieces. INIT has four bars, MP01 has ten bars with some colored (orange and green), MP02 has ten bars, and MP03 has ten bars. Below each stage, a right-pointing arrow indicates the next step: MP01 to WA01, MP02 to WA01, and MP03 to WA02. On the right side, there is a navigation bar with icons for 'Telegramme', 'Manuelles T...', 'SPSen', 'Info', and 'Handling Unit'. Below this is a list of product history entries, each starting with a hexagonal icon and followed by 'Sample Product ID 12345678' and 'INIT > WA01'.

## How our UI5 services can add real value

- Design**  
Modern, functional, loved by users 
- Mobile**  
1 app, many devices, GPS, camera & more 
- Offline**  
Work anywhere with high performance 
- Quality Assurance**  
Continuous Integration Service, Automation, Testing, Versioning 
- SAP Certified**  
Quality consultation, Fiori standards, SAP Partner 
- Enterprise Ready**  
SAP Cloud Platform, IoT, Machine Learning, Large Projects 

## Continuous Integration as a Service

Continuous Integration & Delivery as a Service is a fundamental enabler of agile, rapid application development.

 **Code**

 **Build**

 **Integrate**

 **Test**

 **Release**

 **Deploy**

 **Operate**

It is a requisite for effective Quality Assurance policy and delivers massive cost savings over the application lifecycle. abat offers this service to our customers.

## ABOUT US

# abat

The abat Group, founded in 1998, is an SAP service provider, innovative software developer and provider of complete solutions for software-supported process optimization –

primarily in the core industries of automotive and discrete manufacturing as well as in logistics processes and production control. With our six service areas, we give companies the freedom they need for new ideas, efficient processes, and future-oriented solutions.

In the **consulting** service area, we advise and support you in all phases of an SAP project – from conception to implementation to operation of your SAP system. With abat **manufacture**, you receive digital, high-availability solutions for production control in the complex manufacturing industry. With abat **transform** we offer you innovative and unique solutions that make you special: from AI to cloud to X-Reality. The **PLM** area offers comprehensive process consulting with the goal of achieving a continuous data flow across PLM, ERP and MES. Offerings from the **protect** area help customers secure information and maintain the confidentiality, availability, and integrity of business relationships. Finally, our **sustain** experts advise on how sustainability and CSR reporting can be strategically and structurally anchored in the company.
